CUSTOMER SERVICE ANNOUNCEMENT ON ICE FACTS

The less ice you put in your glass the quicker it melts and ruins your cocktail, G&T or even a soda.

A glass full of ice melts slowly (including crushed ice) and therefore does not water down your enjoyment.

Our recipes are measured for balance/taste and to fit the vessel it comes in - Ice is a crucial factor in this, the glass is meant to be filled with ice to hold the flavour of the drink for longer

A glass full of ice does not mean your drink is watered down... but we appreciate some drinks without... so to keep it simple below are some of our drinks that can come 'Straight up' for you.

Margarita, Whisky Sour, Espresso Martini, Pornstar Martini
